- Kept abreast of the latest and emerging technologies.

## SUMMARY

I am a goal-driven Software Engineer with a strong background in Front-end and Mobile Development. My professional experience encompasses hands-on proficiency in technologies like JavaScript, TypeScript, React, React Native, Redux, Node.js, WebSockets, Figma, and Python. My emphasis lies in developing robust software applications with user-friendly interfaces, contributing to business expansion and elevating overall user experience.

## EDUCATION

### B.Sc. Mathematical Sciences

Federal University of Agriculture  
Abeokuta

06/2012 - 02/2017

## SKILLS

JavaScript React React Native

TypeScript Next.js GraphQL

Figma Node.js WebSockets

## ACHIEVEMENTS

**Leading a team to build an e-commerce mobile app for Shop Owners was a highlight. The focus was streamlining workflows and optimizing UI/UX to empower efficient inventory, sales, and invoicing management. The result was a highly intuitive and user-friendly app that increased employee productivity by 15% and improved customer satisfaction. This experience solidified my passion for leading projects that deliver tangible business value.**
